Abstract—In this paper we propose

Index Terms—xxx.

I. Introduction

- Importance and significance of the topic
- Discuss the background and target audience
- Summarize the surveyed research area and explain why the surveyed area has been studied
- Summarize the classification scheme you used to do the survey
- Summarize the surveyed techniques with the above classification scheme

II. Overview and preliminars

III. Survey

- Present the surveyed techniques using the classification scheme in detail
- Identify the trends in the surveyed area. Give evidences for your decision
- Identify some leading research /products/companies/websites
- Identify the unresolved problems /difficulties, and future research issues

IV. Conclusions and future work

References

- Avoid use of et al. in a bibliography unless list is very long (five or more authors).
- Internet drafts must be marked "work in progress".
- Book citations include publication years, but no ISBN number.
- It is now acceptable to include URLs to material, but ... it is probably bad form to include a URL pointing to the author's web page for papers published in IEEE and ACM publications.
- Leave a space between first names and last name, i.e., "J. P. Doe", not " J.P.Doe
